

Monitor Your Home from Anywhere

The IONIT system is the easiest way to know your fuel levels, avoid run-outs and potentially devastating frozen or burst pipes. Like our name says, we help you keep an “eye on it” from any place and at any time. Simply use your smart phone to check your tank’s fuel level, or your home’s temperature. There is peace of mind in knowing, and IONIT aims to help you stay warm, safe and secure.

The IONIT system uses state-of-the-art wireless sensor technology to measure fuel level, temperature as well as other conditions. Your fuel company has access to the system 24 hours a day, to monitor your home and help prevent a costly disaster.

Smart Phone Access

- View your home’s fuel and temperature from your smart phone
- Monitor your home at anytime from any place
- No app required - uses your smart phone’s Internet browser

Wireless Sensors

- Measures level in your oil tank
- Measure temperature anywhere in your home
- Temperature sensor can be wired to detect burner shut-down

Internet Hub

- Receives and sends measurements from sensors
- Sends data over your Internet connection
- Works with optional cell modem
- Safe and secure
